

PE/PP Film Washing Recycling Line (300kg/h-2000kg/h)

Plastic PE PP film bag washing recycling line is used to processing and washing post-consumer LDPE film,LLDPE film,PP woven bag,etc. The vital point of PE PP film washing recycling solution is how to improving output capacity and control the final flakes humidity.RETECH technical team always pursue this responsibility to make it happen.

RETECH could design different models of capacity PP PE film bag recycling line by detailed requirements from customers and material conditions.

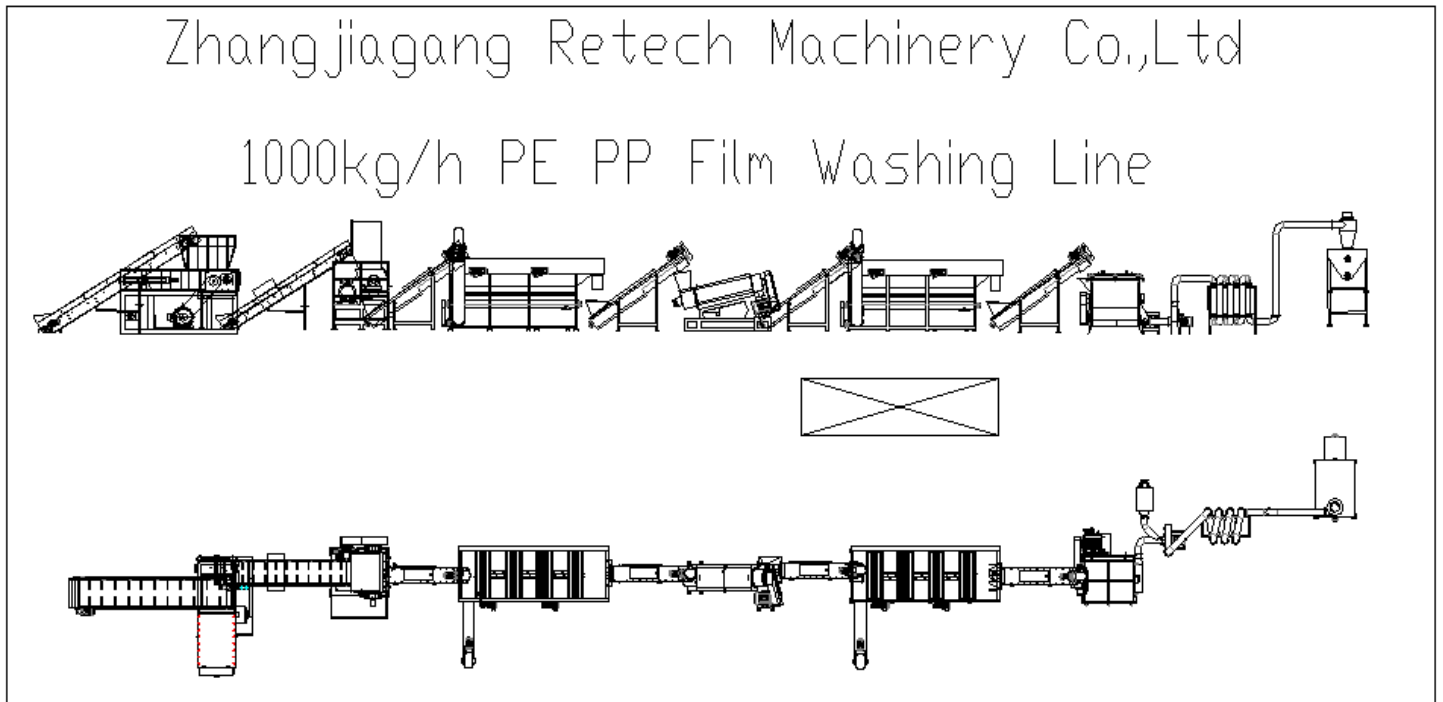

Estimated PP PE Film Washing Plant Parameters:

Capacity (kg/h)	Power(kw/h)	Area(m*2)	Labor
300	130	150	2
500	280	300	3
1000	425	500	3
2000	610	850	4

(Note: Above parameters just for reference)

Layout Of PP PE Film Washing Recycling Plant:

PP PE Film Squeezer
